- THREE APARTMENTS · THREE CLIENTS · IN OPERATION SINCE 2026

Small format, **big effect.**

You don't need a villa for a home to become intelligent. Three Swiss apartments, three different households, each equipped to its needs — and operated daily, locally, without building work. **These are clients, not showcases:** the numbers below are taken from their installations in service.

Apartment A

- **38 devices** across 5 rooms — the essentials done well: lighting, presence, daily life.
- In continuous operation since February 2026.

Apartment B

- **48 devices** across 7 rooms, managed heating and multiroom audio.
- In continuous operation since February 2026.

Apartment C

- **60 devices** across 14 rooms and zones, multi-zone heating.
- In continuous operation since April 2026.

WHY THE APARTMENT IS IDEAL GROUND

NO WORKS

Nothing to break

Everything runs over wireless and existing sockets — rental-friendly.

BUDGET

Start small

A few hundred francs are enough to begin — and you extend room by room.

DAILY LIFE

The effect is immediate

Light follows life, heating anticipates, the home watches while you're away.

MOVING OUT

It moves with you

The box and the devices are reinstalled in the next home — nothing is lost.

THE THREE APARTMENTS IN NUMBERS

Measured on the same day, on installations in service.

3

equipped client households

146

controlled devices in total

26

rooms and zones

24/7

continuous local operation

Numbers taken from real operation — three clients, three homes, no demo installation.

Your apartment too?
From approx. CHF 3'000 turnkey
Or on your own from CHF 230
