

• COMPANY SITE · 16 CAMERAS · 245 MOTION DETECTORS

A site that **watches over itself.**

In Etoy, the site of a regional company is covered end to end: **16 cameras and 245 motion detectors** across 15 zones, 870 sensors in total. Everything is processed locally — detection, alerts and recording depend on no cloud, and the site speaks up when something deserves attention.

See

- 16 cameras in a mosaic, on site and on the phone.
- Recording on detection — you find the relevant moment, not hours of nothing.

Detect

- 245 motion and presence detectors — every zone knows what happens in it.
- Useful, filtered alerts — no notification flood.

Warn

- Outside working hours, every event is reported immediately.
- A failing device reports itself — coverage stays complete.

WHY LOCAL CHANGES EVERYTHING IN SECURITY

AUTONOMY

Internet down? It watches.

Detection, sirens and recording work without a connection.

DISCRETION

Images stay on site

No video is sent to a third-party cloud — everything is processed locally.

SCALE

15 zones, one logic

Hundreds of monitored points, a single screen to understand it all.

RELIABILITY

The system checks itself

A silent camera, an inactive sensor: the installation detects its own gaps.

THE SITE IN NUMBERS

Measured on the installation in service.

16

cameras in operation

245

motion detectors
